5

④ sociable (KOMMOD)

3

③ unpleasant person (UNGUSTL)

6

② to laugh (KUDERN)

7

Dialects connect and strengthen our brain

Dialects create a cultural connection, closeness and trust, and they enrich linguistic diversity. In addition, cognitive processes (e.g. creativity,

flexibility) are stimulated and social integration is supported. This makes dialects a good basis for interpersonal communication. They are also often associated with pleasant memories: old words, poems and sayings.
