③ SHORT-TERM MEMORY SOLUTION

1
THE KONGRESS & THEATERHAUS
(previously the Kurhaus) was built by the architect Hyazinth Michel between 1873 and 1875. There have been conferences between monarchs and statesmen behind the Gründerzeit facades of the building.

2
THE KAISERVILLA IN BAD ISCHL
in Bad Ischl was the summer residence of Emperor Franz Joseph I and Empress Elisabeth (Sisi) of Austria. The building at the foot of the Jainzenberg was originally a villa in the Biedermeier style, built in 1834 by the Viennese notary Josef August Eltz.

3
THE MARMORSCHLÖSSL
in the Kaiserpark of Bad Ischl was used by Emperor Franz Joseph I and Empress Elisabeth as a breakfast salon. Empress Sisi also used it as a special retreat.

4
THE STADTPFARRKIRCHE ST. NIKOLAUS
is the Roman Catholic parish church of the diocese of Linz in the town of Bad Ischl. The oldest documentary mention of a church in Ischl dates back to 1320.

5
THE TRINKHALLE
is a listed former spa complex. Today, the Trinkhalle functions as a "Haus des Gastes" and is firmly anchored in the life of the town through its use for cultural, tourist and social purposes.

6
THE "SCHNITZEL LOGO" OF SALZKAMMERGUT 2024
symbolises the region of the Salzkammergut and the 23 municipalities that are partners of the European Capital of Culture Bad Ischl Salzkammergut 2024.

7
THE WIRER DENKMAL
stands in the Kurpark. It is thanks to the Viennese physician Dr. Franz Wirer (1771-1844) that Ischl owes its lasting reputation as a world-class spa resort and "imperial town".

8
THE EINSIEDLERSTEIN
a place of culture and legends, is located halfway up the path to Siriuskogel. After the Traun glacier melted, a rock that it had transported remained as a so-called erratic.

Exercise for short-term memory

Short-term memory stores information for a short period of time before it is then either forgotten or transferred to long-term memory. The capacity of short-term memory is limited. Information can only be retained for up to 30

seconds and only 7 units of information (± 2) can be held.

Short-term memory plays a hugely important role in coping with everyday tasks (e.g. mental arithmetic, remembering telephone numbers) and it is the basis for powers of concentration and for attention.
